THE DMG LIFT CONTROLLER:

THE SMART CHOICE FOR LIFT MODERNISATION

OFFICIAL AGENT

**UPGRADE
YOUR LIFT
QUICKLY,
EASILY
AND WITH
CONFIDENCE.**

HIGH-QUALITY, FUTURE-PROOFED SOLUTION

When it's time to modernise a lift, choosing the right lift control system is essential to ensure reliability, efficiency, and long-term value. As a lift professional, you understand the challenges of lift modernisation, and the DMG PB4 Lift Controller is designed to help you deliver a high-quality, future-proofed solution to your customers.

Enhanced Performance & Reliability

The PB4 incorporates advanced technology to ensure smooth, efficient lift operation, reducing breakdowns and minimising maintenance needs. Whether you're upgrading a residential or multi-floor building, this controller delivers the reliability your customers need.

**SMOOTH,

OPERATION,
REDUCING
BREAKDOWNS
AND MINIMISING
MAINTENANCE
NEEDS.**

Predictive Maintenance for Reduced Downtime

The PB4's intelligent software continuously monitors lift performance, identifying potential issues before they cause failures. This helps you reduce emergency callouts and ensure a smoother experience for your customers.

Advanced Connectivity for Easier Maintenance

With Wi-Fi and 4G connectivity, the PB4 is ready for app-based monitoring, diagnostics, and performance optimisation. This means less time on site and faster troubleshooting.

Safety & Compliance

The PB4 meets the latest European safety standards, including the EU Lift Directive and EN81-20/50, ensuring lifts operate safely and efficiently.

Flexible Modernisation Options

The PB4 supports a wide range of lift configurations, including MR Gearless, MRL All-In-One, MRL Star, and hydraulic systems. Whether you're modernising a single lift or a multi-lift system, this controller provides a modular and adaptable solution.

Tailored to Your Requirements

Our stock PB4 Lift Controller is built in the UK to match your specific lift system. This enables you to provide a customised solution for any application, ranging from small residential lifts to large commercial installations. More complex and bespoke solutions are available through our partner DMG.

Faster Turnaround & Local Support

We know that keeping lifts operational is crucial for your customers. Our UK-based team provides full support throughout the product's lifetime. With same-day dispatch for spare parts, you can avoid lengthy delays and keep projects on track. Together with our ex-stock controller being built and ready for dispatch in an average of 7 days from final approval.

DEDICATED UK SUPPORT

Dedicated Technical Support

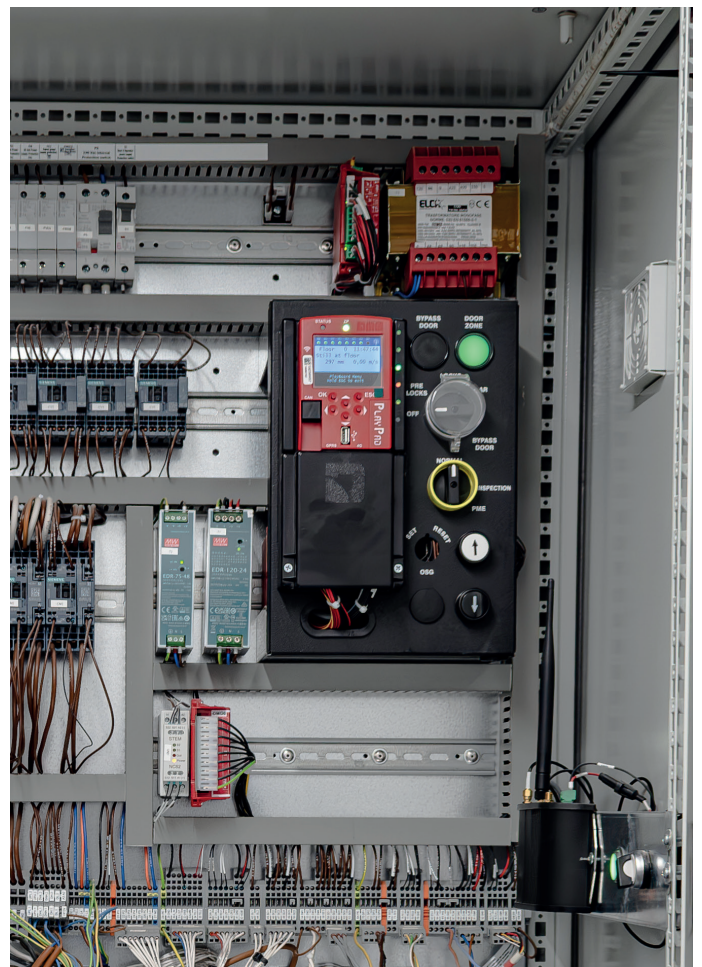

When you install the PB4, you get more than a high-quality product. Our dedicated UK support team is available to assist with troubleshooting, training, and providing timely replacements as needed. You also gain access to DMG's online knowledge base, DIDO, with interactive manuals and tutorials.

Industry-Recognised Quality

With over 5,000 DMG units installed across the UK and Ireland, Shorts and DMG are the trusted choice for lift professionals. Its proven reliability ensures that you can deliver projects on time and minimise inconvenience for your customers.

Future-Proofed for Long-Term Value

Older lift controllers struggle to support modern lift components and safety features. The PB4 is designed to integrate with today's technology while being adaptable for future advancements, ensuring long-term reliability and efficiency for your customers.
